Summary

A passionate 19-year-old Computer Science enthusiast with a strong focus on Embedded and Mobility Ecosystem development, primarily on the frontend. I began my academic journey at 42 Seoul (2020-2023) and later transitioned to 42 Wolfsburg, diving deep into car-related programming. Alongside this specialization, I have hands-on experience in React.js web development, a foundation in AI (including machine learning and deep learning), and a solid grounding in core Computer Sciences. Driven by global aspirations, I aim to broaden my horizons and make an impact on a worldwide scale. My multiple team-based projects vouch for my adept communication skills, a collaborative mindset, and proficiency in team-oriented development methodologies, especially with tools like Git.

Certification

2019.11	Computer Specialist in Spreadsheet & Database Level I (by KCCI)

Soft Skills

Communication
Worked in diverse team settings, including a group of 10 members where I played a role in resolving conflicts stemming from team dynamics. My ability to facilitate understanding has proven effective, particularly in teams with varied cultural backgrounds, leading to more efficient collaboration.

Organizations
I have a foundational familiarity with managing Git repositories and ensuring structured projects. My experiences underscore my capability in upholding organized workflows for both individual and collaborative endeavors.

Learning
At 19, with 3 years of immersion in Computer Science, I am always on the lookout for growth opportunities. This is reinforced by my enthusiasm for engaging with new cultural insights and expanding my knowledge base.
